Find your way at a glance

70% of office workers spend more than 15 minutes each day looking for meeting rooms. 24% spend more than 30 minutes. Let's give some of that wasted time back to your employees.

Humly Wayfinding is developed to reduce frustration and friction at the office so that your employees can save their brain power and focus on what's most important.

Intuitive and efficient
Inspired by airports, Humly Wayfinder combines simplicity with efficiency. Directions within seconds. No maps to pour over.

Inspired by airports
Just like the airport departure board shows a list of flights in chronological order, Humly Wayfinding shows a list of meetings. Ongoing meetings show at the top, followed by meetings that are about to start. Further down meetings later in the day can be found. The information can be shown on any screen or system with a web browser. It is highly configurable to match all the different use cases you will find in an office and can display the following information:
- Meeting subject and organizer.
- Name of meeting room.
- Building, floor, directions and distance.
- Your company logo and custom message.

- QR code.
- Available desks (if you use Humly Desk Booking).

Easy setup
Humly Wayfinding is easy to set up using the Humly Control Panel on a Humly Cloud Server or installed on a local server.

Flexibility for your freedom
Just like the rest of our products, Humly Wayfinding can run in parallel with almost all other booking systems and solutions on the market without issues as we like to offer full flexibility and freedom to our customers.

Specifications

Technical Requirements:
- Any screen or device that can display a website
- Humly Server (cloud or on premise)

Compatible platforms
- Microsoft Exchange/Office 365
- Google Workspace
- HCL/IBM Domino/Notes
